I drafted this for release, which I agree should go out tonight if possible.  
Joan – is the highlighted area accurate? Will the water quality data fact sheet be released soon?

**Subject:** CBS This Morning Inquiry

Hi there,

I wanted to follow up with some questions I had after today's conference call....

At this point how much waste water is coming out of the Gold King Mine? I know yesterday it was around 500 gallons/minute. Is that still the same?

Where is the plume now? When do you

anticipate it will reach Lake Powell?

Any more information on potential risk to human health?

Many thanks in advance,

Myra Zuleta
